PRESS RELEASE

SAFER AND MORE CONVENIENT MARINA BATTERY CHARGER FOR MODERN BOAT OWNERS

CTEK SWEDEN HAS DEVELOPED M200 AND M300 – TWO MARINA BOAT CHARGERS TOTALLY FOCUSED ON MEETING THE BATTERY AND CHARGING NEEDS OF MODERN BOAT OWNERS.

SAFETY, CONVENIENCE AND EFFECTIVENESS WERE THE RESULTS OF THESE CHARGERS, WHICH HAVE THE DESIGNATIONS M200 AND M300.

THE CHARGERS WILL BE AVAILABLE PRIOR TO THE START OF THIS YEAR'S SEASON IN ALL WELL-ASSORTED MARINE SHOPS.

M200 (15A) and M300 (25A) are two specially-developed powerful and fully automatic marina boat chargers that analyse the condition of the battery, charge it when it needs charging and trickle charge it when the boat is not in use. CTEK has also solved one of the major problems facing boat owners today – namely, these chargers do not produce any harmful galvanic currents under the boat like other traditional chargers do.

These extremely smart and effective chargers are also spark-free, protected against short circuits and cannot be connected incorrectly. This means that anyone onboard can handle the chargers safely and easily. They are also electronics-safe and will not damage the sensitive electronic equipment found in practically all modern boats.

Sulphurisation is also a known problem with batteries, but M200 and M300 analyse the battery's condition. If sulphurisation is detected, the chargers simply convert to pulse charging, which desulphurises the battery, thereby saving it.

To make installation even easier, a 4-metre secondary cable and temperature sensor come as standard equipment.

The battery is given an extended service life and optimum performance both by the chargers' temperature sensor, which gives the battery an optimal charge current, and through CTEK's unique RECOND mode, which handles and corrects any acid stratification in the battery.

M200 and M300 + Starter can be connected for months at a time, making these chargers ideal for all Swedish boat owners, considering that six months of the year they cannot take their boat out as often as they would like.
