CTEK LAUNCHES PORTABLE EV CHARGER

CTEK NJORD GO LAUNCHED, FOR FAST, RELIABLE EV CHARGING WITH APP CONTROL

CTEK, the leading global brand in battery management solutions, has today launched the NJORD GO, a portable 11 kW EV charger that gives you fast, reliable Electric Vehicle (EV) charging at home, or when you're on the move. The charger can be used with a free to download CTEK App to give you full Bluetooth® wireless technology and WiFi control over charging current and scheduling, for maximum flexibility.

With the NJORD GO, there is no installation necessary, you simply plug the unit into your domestic or commercial 3 phase CEE socket, and it'll do the rest – quickly and safely. This exciting new product, which is 3 times faster than schucko charging, is completely automatic and simple to use, with a user interface that clearly indicates charge status.

NJORD GO is a durable, lightweight and portable all-in-one EV charger with a type 2 connector, it is supplied with a fixed heavy duty 1.5 m long mains cable and 5 m EV charging cable. It has in-built safety features such as an earth fault circuit breaker and DC leakage detector. State of the art natural convection cooling technology, enables you to deliver higher charge levels, even when the ambient temperature is rising, without the risk of the unit overheating.

A free to download CTEK App, will give total control over charging directly from your Android or IOS mobile phone via BLUETOOTH® or WiFi. App users will be able to schedule sessions, lower or increase power to the vehicle to balance the load at times of high domestic power consumption, automatically start, pause or stop charging remotely and record charging history.

The NJORD GO can also be supplied with a wall-mount accessory for a more permanent EV charging solution. The wall-mount provides lockable, safe and secure wall mounting for the NJORD GO and also comes with a hook for secure cable handling.

Cecilia Routledge, Global Director for EV said "We are really excited to launch the NJORD GO EV charger into our range of Electrical Vehicle Supply Equipment (EVSE) range of chargers. As we see an exponential rise in the number of EVs on the road across Europe, we are also seeing a growing demand for a more portable solution that people can use in more than one location. The NJORD GO portable charger takes all the hassle out of charging your EV whether you're at home, at work or even on vacation. The initial response from the market has been really positive and we expect the NJORD GO to be a successful new edition to our next generation range of chargers and accessories."
