

# Nanogrid Air – 3007

Firmware Upgrade Instructions

Date	Doc No	Page
2023-10-09	20231009002	1(3)

### 1 Firmware Upgrade Instructions – Nanogrid Air

#### 1.1 Open Nanogrid Air Settings Page and Login

Open Nanogrid Air Settings page (see Figure 1) by accessing its local IP-address using a web browser. Check your WiFi-router manual for instructions on how to receive the correct local IP-address for your Nanogrid Air.

Instead of using the local IP-address the address <u>http://ctek-ng-air.local</u> can be used – if your router supports mDNS.

Figure 1 Nanogrid Air Settings Page

Login using *ctek* as Username and then the Password you selected during the Nanogrid Air configuration process. Please refer to the Nanogrid Air manual for further details if needed.

#### 1.2 Select Firmware

Scroll down to Firmware Upgrade and press Select File – see Figure 2. Locate and select your downloaded Firmware. The Firmware is available for Download at: <a href="https://www.ctek.com/support/software-firmware">https://www.ctek.com/support/software-firmware</a>

Press the Upload button.

Figure 2 Firmware Upgrade

### 1.3 Reboot Nanogrid Air

Check so that the message "File upload complete reboot to upgrade" is displayed – see Figure 3.

Doc.no.

Figure 3 Upload Complete

Reboot Nanogrid Air by pressing REBOOT – see Figure 2.

When Nanogrid Air has completed the reboot you can login again. Under the headline *Device Info* the new firmware revision number will be displayed – see Figure 2.

Firmware Upgrade is now complete.
